

# NYSC STAFF E-TRAINING PORTAL

## Staff Quick Guide

*Everything you need to register, learn and get certified*

Prepared for NYSC Staff Users

## How This Works

---

In simple terms: you create an account once, then log in any time to work through the courses assigned to you. Each course has short videos, readings and mini quizzes. When you finish everything, you download your certificate. That's the whole journey — this guide walks you through each step.

## 1. Getting Started

---

### Register (first time only)

1. Click "Register here" on the login page.
2. Enter your name, file number, email and phone number. Your file number is checked automatically.
3. Take a live camera photo — this becomes your identity photo for exam verification, so make sure it's clear.
4. Create a password (8+ characters) and click "Create Account".
5. Enter the 6-digit code sent to your email to verify and finish.

### Log In

- Enter your file number or email and your password, then click "Login".
- Forgot your password? Click "Forgot Password?", enter your email, then the code sent to you and a new password.

## 2. Your Dashboard

After logging in you land on your Dashboard — a summary of your assigned courses, average progress and certificates earned.

Use the sidebar menu to get around:

| Menu Item      | What it's for                              |
|----------------|--------------------------------------------|
| Dashboard      | Your training summary                      |
| NYSC Books     | Official handbooks and resources           |
| Courses        | Courses assigned to your cohort            |
| Test/Exams     | Standalone exams (promotion/certification) |
| Result         | Your test and course results               |
| Certifications | Certificates you can download or print     |

Your photo (top right) opens Profile and Settings. The bell icon shows notifications.

### 3. Completing a Course

---

Open "Courses" to see everything assigned to you, then click Start / Resume / Review to enter a course.

#### How a module works

Each module follows the same order — any step it doesn't use is simply skipped:

| Order | Step         | What it is                        |
|-------|--------------|-----------------------------------|
| 1     | Pre-Test     | Short check before the material   |
| 2     | Activities   | Videos, PDFs, slides, audio, text |
| 3     | Live Session | Scheduled virtual class           |
| 4     | Post-Test    | Check after the material          |

- Materials are marked complete automatically as you view them — pick up later right where you left off.
- Joining a live session: use the "Join" button and set your meeting name to your full name + file number so attendance is recorded.
- The course ends with a short Course Evaluation (star rating + optional comment). Submitting it unlocks your certificate.

## 4. Tests & Exams

---

Course Pre-/Post-Tests open from inside their module. "Test/Exams" in the sidebar is only for standalone exams (promotions, certifications). Every test is proctored — your camera verifies your identity and monitors you throughout.

### Before you start

- Working webcam, quiet well-lit room, no help from others.
- Stable internet — timed tests submit automatically when time runs out.
- Stay on the test tab — switching tabs/windows or exiting full-screen is recorded.

### Starting

1. Click "Start Assessment" and allow camera access.
2. Take a verification photo — it's matched against your registered photo.
3. Once verified, the timed test begins. Answer questions, use the navigator to jump between them, then click "Submit Attempt".

#### EXAM CONDUCT

Take tests alone and undistracted. Multiple faces, a missing face, or repeated tab-switching can flag your attempt for review.

Your result (Passed / Not Passed) and score show immediately. If you have attempts remaining, you can retake it — your attempt history is always visible.

## 5. Certificates & Results

---

"Certifications" shows what you've earned and what's still needed for courses in progress:

- Complete every module and all learning materials
- Pass the post-assessment (where one exists)
- Submit the course evaluation

Once earned, select a certificate to preview it, then Print or Download PDF. "Result" in the sidebar lists your best score for every course and assessment you've taken.

## 6. Profile & Settings

---

- Profile: view your official details; click "Edit Profile" to update your phone number, or hover your photo to retake it (keep it current for exam verification).
- Settings: change your password, and turn email/SMS notifications on or off.

## 7. Quick Help

---

| Issue                                      | What To Do                                                                                           |
|--------------------------------------------|------------------------------------------------------------------------------------------------------|
| File number not recognised at registration | Check it's typed correctly; if it still fails, contact your training administrator.                  |
| Didn't get an OTP / reset code             | Check spam, then use "Resend OTP".                                                                   |
| Camera won't turn on                       | Close other apps using it and allow camera access when your browser asks.                            |
| A course is locked                         | A prerequisite isn't finished yet, or your cohort hasn't been unlocked — contact your administrator. |
| Certificate not showing                    | Check the requirements checklist under "Certifications" — something is still incomplete.             |

Still stuck? Contact your NYSC training administrator or your organisation's IT/support desk.
